25KW NBS Smoke Density Chamber

Product Overview: The 25KW NBS Smoke Density Chamber is a state-of-the-art fireproof testing device designed for evaluating the smoke density of materials under controlled conditions. Manufactured using high-grade SUB304 stainless steel, this equipment ensures durability and precision for flammability and smoke density tests. The chamber complies with international standards and is certified by CE.

Technical Specifications:

Attribute	Details
Product Name	Flammability Test Equipment
Brand Name	YUYANG
Model Number	YYC003
Place of Origin	CHINA
Certification	CE
Device Size	1700 (W) × 750 (D) × 2000 (H) mm
Electric Control Box Size	W1100 × D500 × H700 mm
Weight	120 kg
Power Supply	220V AC, 16A
Test Times	0-99999
Test Speed	0-60 times per second (adjustable)
Size Customization	Available

Key Features:

- 1. Fireproof Construction: Made of SUB304 stainless steel for high durability and safety.
- 2. Precision Testing: Adjustable test speeds from 0 to 60 times per second.
- 3. User-Friendly Design: Includes a compact electric control box for ease of operation.
- 4. Customizable Options: Device size can be tailored to specific requirements.
- 5. High Capacity: Supports up to 99999 test cycles.
- 6. Global Standards Compliance: CE-certified for assured quality.

Applications:

- Smoke density testing for materials used in construction, automotive, and aerospace industries.
- Flammability tests for compliance with safety regulations.

Product Highlights:

- 25KW Smoke Density Chamber
- NBS Smoke Density Chamber
- Smoke Flammability Test Equipment

Packaging & Delivery:

- **Packaging:** Secure wooden crate for safe transport.
- Delivery Time: Available for Ship.
- Included Accessories: Standard operational manual and basic toolset.
